

Anti DDoS Tunnel for Networks

The Anti-DDoS Tunnel is the quickest way for an entire Network and its downstream customers to be protected against volumetric or application specific DDoS attacks. It is a completely automated solution that filters the traffic only when an attack is detected. It is compatible with all edge routers supporting GRE or L2TP and gives the Network total control of which subnets are advertised through this tunnel via BGP advertisements.

No Commitment - Price per Month

The price is for a full calendar month, regardless of how many days are within that month. You can request to cancel the service anytime ("no contract"), but the service will be terminated, regardless if it's used or not, in the last day of that month.

Prices does not include taxes

Monthly

+ Usage

'Clean traffic' sent to you is cumulated with traffic received from your network and is charged at the end of the month with 95/5 rule rounded up in 100 Mbps increments. First Gbps is free of charge. Each additional 100 Mbps is charged with

One-Time Setup

Delivery in

	Total
	\$1955.00
	\$80.5/100 Mbps
