Anti DDoS Tunnel for Occasional Protection

Anti-DDoS Tunnel for Occasional Protection is the most economical way for an entire Network and its downstream customers to be protected against volumetric or application specific DDoS attacks that occur infrequently. It is a completely automated solution that filters the traffic only when an attack is detected. It is compatible with all edge routers supporting GRE or L2TP and gives the Network total control of which subnets are advertised through this tunnel via BGP advertisements.

No Commitment - Price per Month The price is for a full calendar month, regardless of how many days are within that month. You can request to cancel the service anytime ("no contract"), but the service will be terminated, regardless if it's used or not, in the last day of that month. Prices does not include taxes	Total
Monthly	**$513.00**
+ Usage 'Clean traffic' sent to you is cumulated with traffic received from your network and is charged at the end of the month with 95/5 rule rounded up in 100 Mbps increments. First Gbps is free of charge. Each additional 100 Mbps is charged with	$79.8/100 Mbps
One-Time Setup	**$0.00**
