

Full Rack Colocation in Voxility IRD Bucharest

Voxility IRD is strategically located between the two main interconnection datacenters in Bucharest, at just few hundreds of meters away. A service provider hosted in this location can interconnect simultaneously through standard Cross Connects with all networks in NXData-1 and NXData-2 along with all companies already present in Voxility IRD, including Interlan, the largest Romanian public Internet Exchange. Voxility IRD offers a good value for large servers deployments.

1 Year Commitment - Price per Month

The price is for a full calendar month and you commit to pay this price monthly for a full year (one day prior of activation date, next year). You cannot switch to a shorter commitment term and if you request service termination prior the one year anniversary, you still have to pay monthly the cost of this service until the last day of last month or pay a significant termination fee.
