

# HPE ProLiant DL20 Gen9 (E3-1240v5) 2-LFF

A server that runs best applications that are not well balanced across multiple CPU cores. Although, it has only 4 cores and 8 threads, it is especially great to run 10-12 personal virtual desktops which require a high frequency CPU for a short period of time, or 2-4 intensive used virtual machines. As HPE entry-level server, it doesn't have redundant features.

### No Commitment - Price per Month

The price is for a full calendar month, regardless of how many days are within that month. You can request to cancel the service anytime ("no contract"), but the service will be terminated, regardless if it's used or not, in the last day of that month.
